

HDMI™

BizLink Digital Media Interconnect are high-performance connectivity solutions based on the state-of-the-art HDMI™ (High Definition Multimedia Interface) technology. HDMI is the first industry-supported interface for uncompressed, all-digital audio and video transmission. Interconnect based on HDMI technology are expected to be the predominant technology for transmitting digital television audio-visual signals from DVD players, set-top boxes, camcorders and other sources to TV's and projectors.

HDMI™ 1.3 Features

Higher speed: Increases the single-link bandwidth from 165MHz (4.95 Gbps) to 340 MHz (10.2 Gbps).

Deep Color: Supports 30-bit, 36 bit and 48-bit (RGB or YCbCr) color depth, previously only 24-bit depth.

Broader color space: Removes virtually all limits on color selection. The next generation "xvYCC" color space.

New audio formats: In addition to the Dolby® Digital and DTS, HDMI 1.3 will also support Dolby® TrueHD and DTS-HD Master Audio™

New mini connector: Type C connector introduced for portable devices such as camcorders and digital cameras. See below.

Mini HDMI™ (Type C)

BizLink, as one of the earliest adapters of HDMI interconnect solutions, now introduces the new mini HDMI connector Type C. This connector is part of the new HDMI 1.3 specification. Type C connectors will serve the market of portable devices such as HD camcorders, digital cameras, and other portable devices that are in great demand for connectivity to HDTV's.

Company Profile

BizLink is a global manufacturer of connectors, wire, cable assemblies, wiring harnesses and optical components. With factories in China, Malaysia and Mexico, and with sales and engineering support in US, Ireland, Japan and Taiwan, we can not only give you all the benefits as an Asian manufacturer, but also serve you as a local manufacturer. We have RoHS infrastructure in our factories and are ISO9001, ISO14001, TS16949 (QS9000), UL and CSA certified as well.

Quality & Service

We maintain in-house Q&A labs at our main manufacturing facilities which have all the equipment and expertise to perform all mechanical, electrical and environmental tests on all materials and components right on the factory floor. In addition to our own design, we can also manufacture according to your specifications. With our vertically integrated business model we can do not only the cable assembly, but the the wire and connector as well.
