Corporate Commitment and Stakeholder Dialogue

- 1.1 CSR Vision and Commitment
- 1.2 Stakeholder and Material Aspect Identification

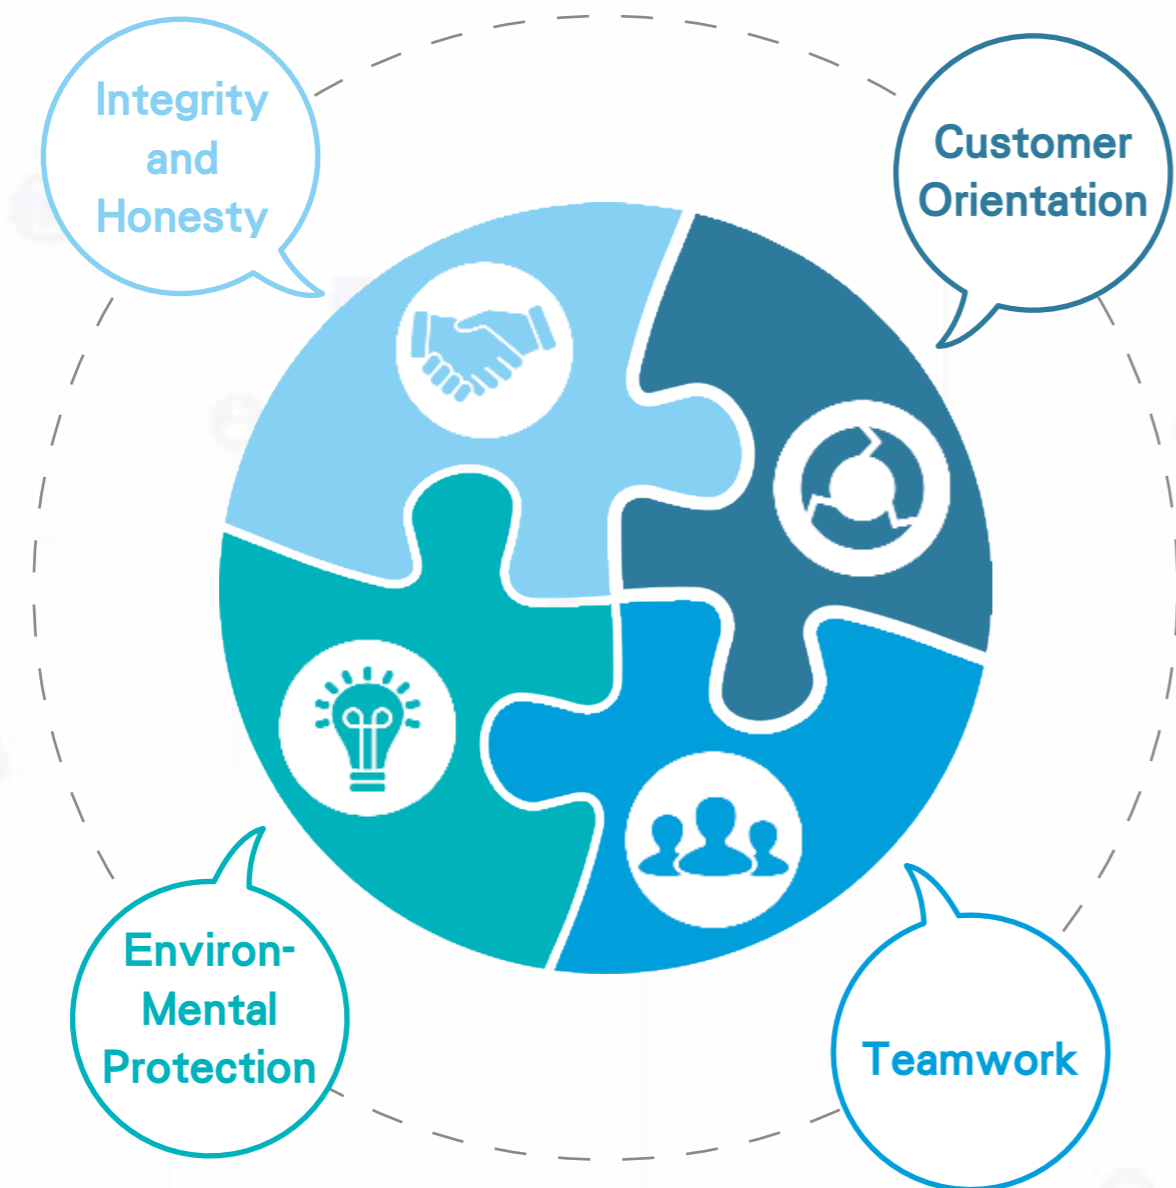

1.1 Corporate Sustainable Development Vision and Commitment

We strive to create “corporate sustainability” through the 4 core values of “integrity and honesty”, “customer orientation”, “teamwork” and “environmental protection”. While pursuing revenue and profits, we insist in playing the role of a global citizen and fulfilling our corporate social responsibilities to generate a constant momentum for growth and for improving our competitiveness.

In order to materialize corporate sustainability, BizLink CEO Felix Teng and senior executives have led by example to establish the Corporate Governance and Sustainability Development Committee directly under the Board of Directors in 2018, which is responsible for creating the corporate management system, reinforcing the sustainability management system, and internalizing sustainable development as an integral part of BizLink’s strategy-making process and corporate culture.

As an ethical and responsible enterprise, BizLink is committed to becoming a global leader and trusted partner of our clients. We firmly believe that smooth stakeholder engagement and environmental accountability will foster the Company’s long-term growth and profitability. As these two goals are achieved over time, BizLink will continue upholding the spirit of giving back to society in promoting environmental protection and corporate sustainability.

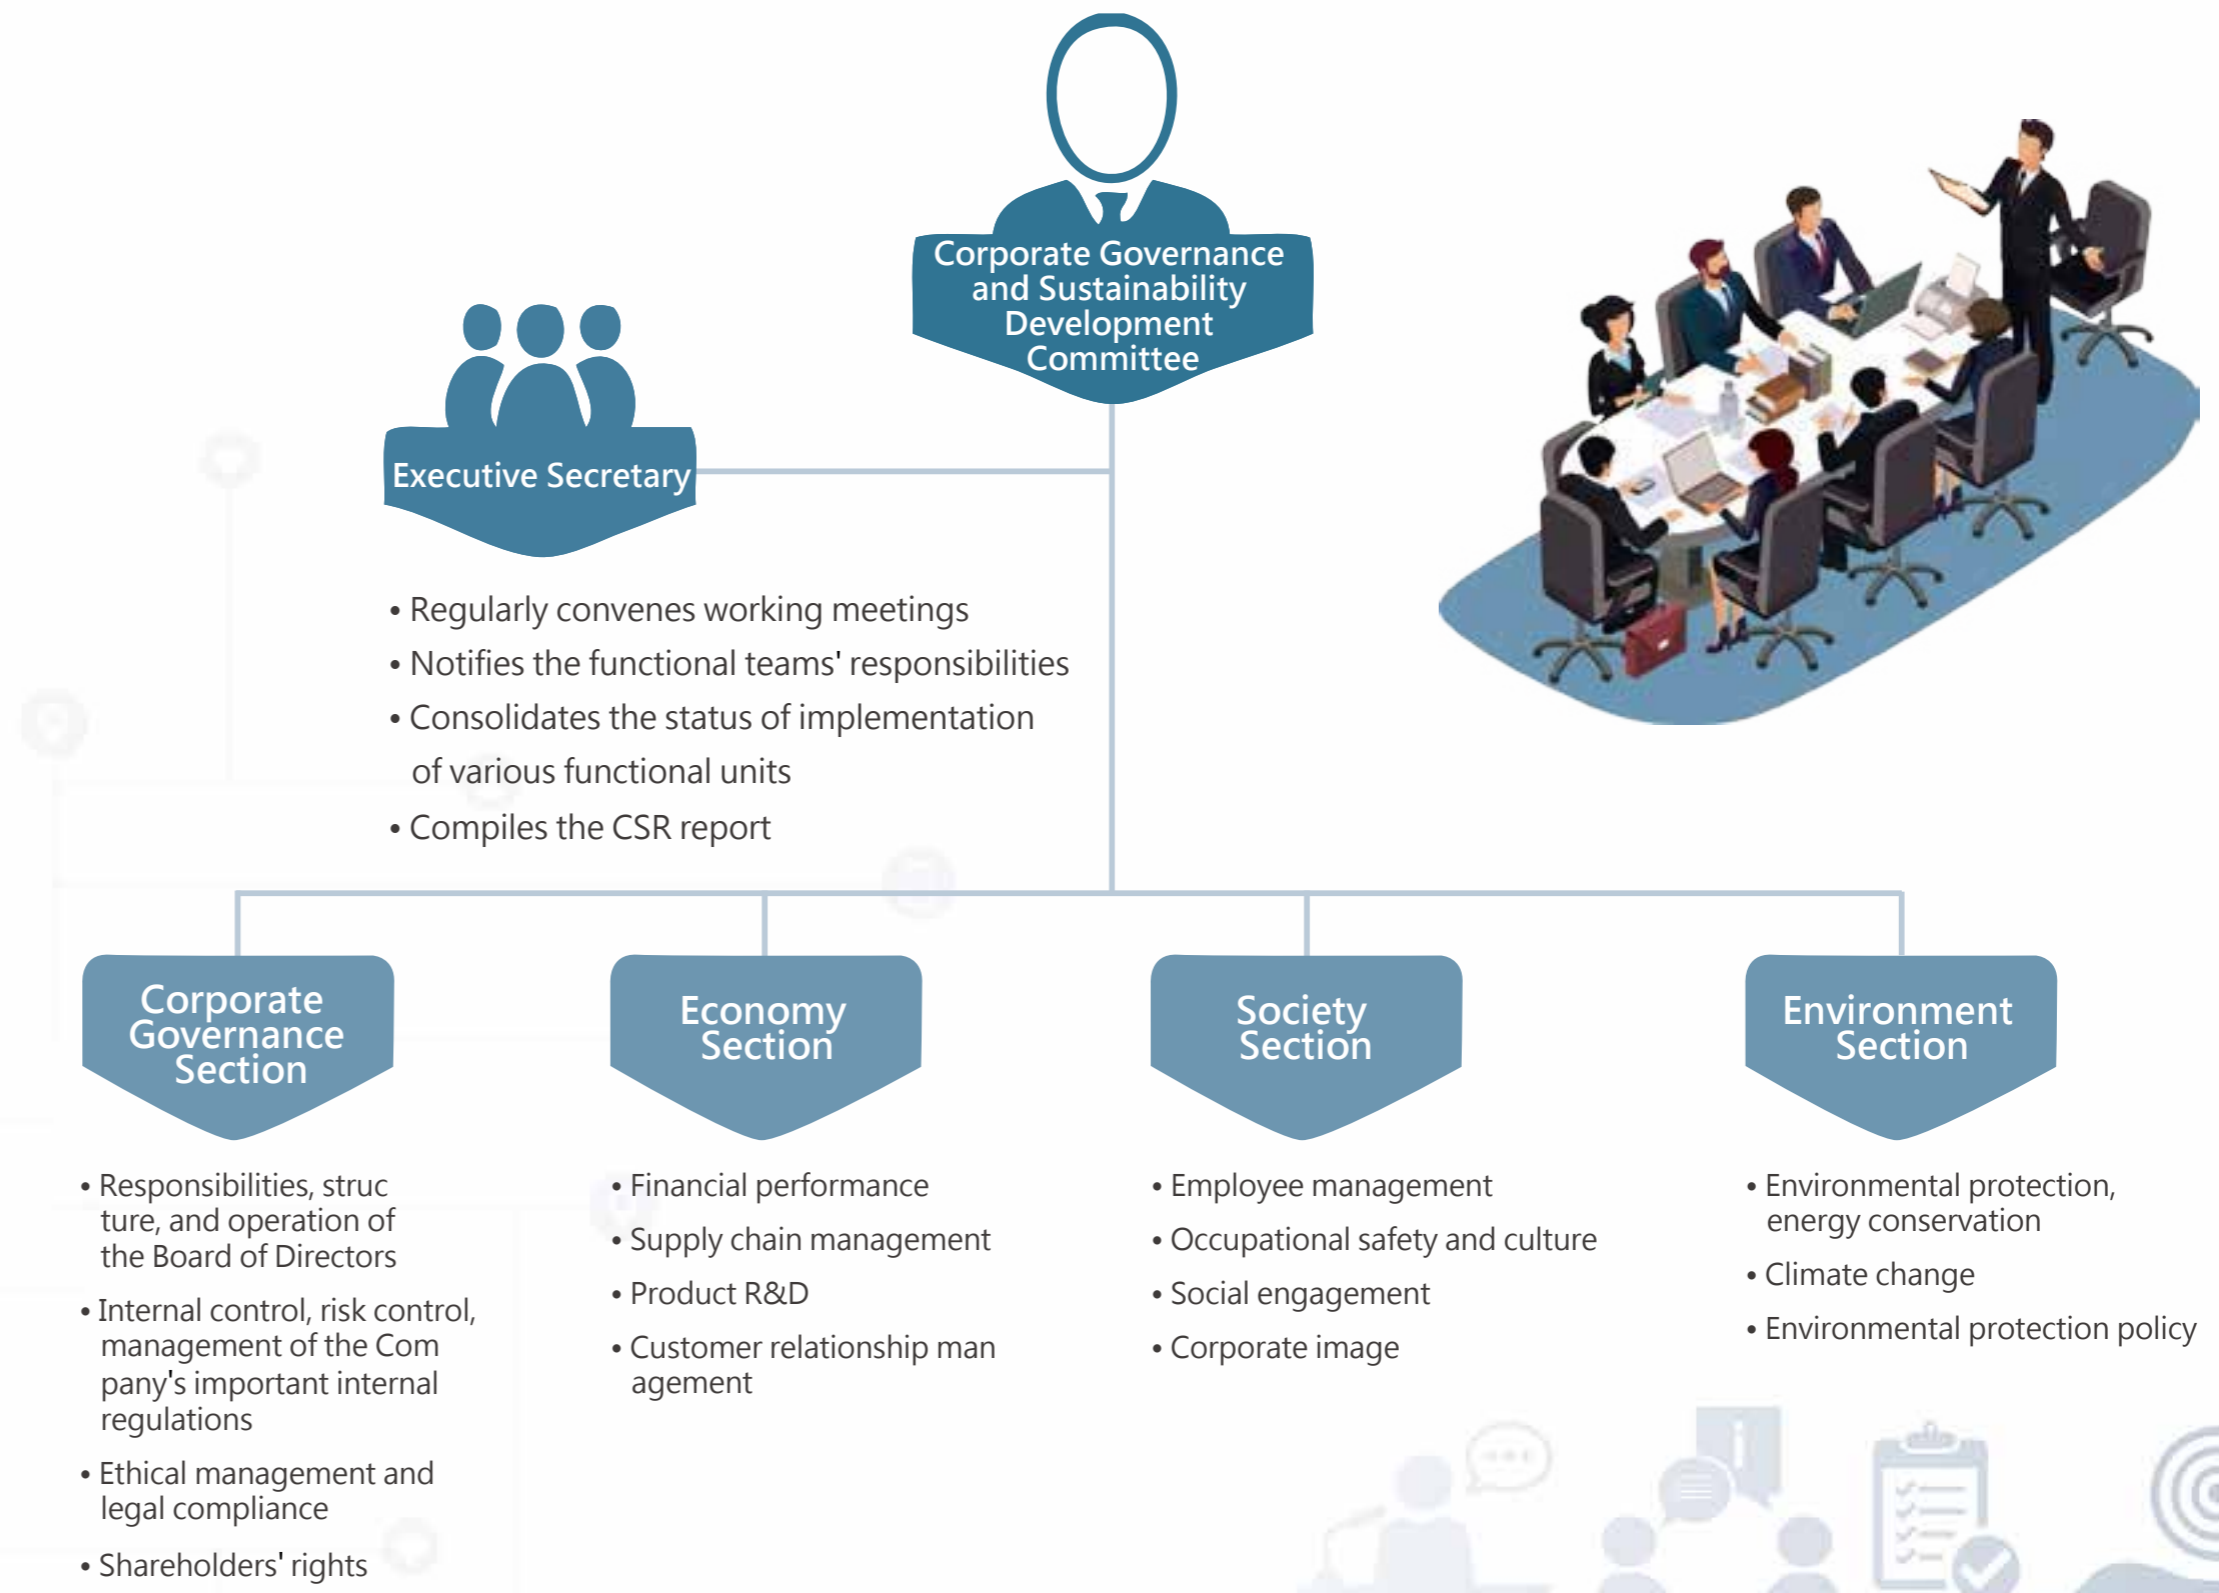

The vision of BizLink in corporate sustainability is to create a society with cultural diversity, humanitarian care, creativity, vivacity, and environmental sustainability. In order to let the Company and our employees actively implement environmental protection and corporate sustainability, we have used the Responsible Business Alliance (RBA)’s Code of Conduct to formulate the CSR Best Practice Principles, encompassing all of BizLink’s subsidiaries. We are committed to abiding by the regulations of the best practice principles, including investment, suppliers, sales development and other sales or employment relations. The best practice principles outline specific commitments within various sustainable development related issues, including business ethics, labor relations, environmental protection, health and safety, management system, corporate governance, and community participation, etc. Moreover, internal and external audits are conducted to assess implementation performance. For details of BizLink’s CSR Best Practice Principles, please refer to BizLink’s official website <https://www.bizlinktech.com/investors/index/4#sub-6>

1.1.1 Corporate Sustainability Promotion Unit

The Corporate Governance and Sustainability Development Committee is responsible for promoting sustainable development within BizLink. Company CEO Felix Teng is the convener, and all senior executives are appointed as members of the promoting team, stipulating corporate sustainability development, corporate governance, economic, environmental and societal goals of sustainable corporate development and supervising the implementation progress. On top of that, they are responsible for leading BizLink to realize the vision of sustainable corporate development as well as short, medium and long-range objectives.

BizLink's Corporate Governance and Sustainability Development Committee is responsible for materializing the Company's commitments to the society, including numerous aspects such as labor relations, employee care, corporate governance, environmental protection, and social welfare. In particular, the most important goals are: respecting and complying with the law, protecting employment rights, improving workplace health and safety, developing green products, minimizing environmental impact, shouldering social and environmental responsibilities, and meeting the customers' requirements.

1.2 Stakeholder and Materials Aspect Identification

1.2.1 Materiality Analysis Technique

Effective engagement with stakeholders is an important foundation of corporate sustainability development. Of the numerous stakeholders, the most important aspect is to identify those who have significant influence over the company's operations and determine the issues that they care about most in a prioritized order. BizLink regularly identifies sustainability-related issues that our stakeholders care about or are interested in to use them as a reference for the report's information disclosure and conduct effective communication with different stakeholders. In principle, the identification process is conducted once a year using stakeholder opinion survey as the tool to gain insight into the issues of concern among stakeholders on a regular basis.

BizLink continues to communicate effectively with our stakeholders. BizLink has implemented the materiality analysis technique by referring to GRI Standards, where the considerations' scope and boundaries are incorporated into the method. The main steps involved are:

Step 1 : Identify Stakeholders

The task of identifying stakeholders is carried out by "Office for Sustainable Corporate Development" by taking into consideration the 5 major principles of AA1000 Stakeholder Engagement Standards (SES), including dependency, responsibility, influence, diverse perspectives, and tension. Five-point Likert scale is applied to categorize stakeholders into : Customers>Suppliers>Employees>Investors/Shareholders/Stock brokers>Government/Authorities>Industry associations>Media/ Research institutions>NPOs/Communities, totaling 8 groups.

Step 2 : Establish Report Communication Objectives

Value different stakeholders' opinions and constantly absorb suggestions in order to rectify the directions and actions of CSR development to meet the stakeholders' expectations and needs more closely during implementation and generate the most beneficial contributions for the environment and society.

8 Major Categories of Stakeholders

5 Major Principles of Stakeholder Engagement Standards

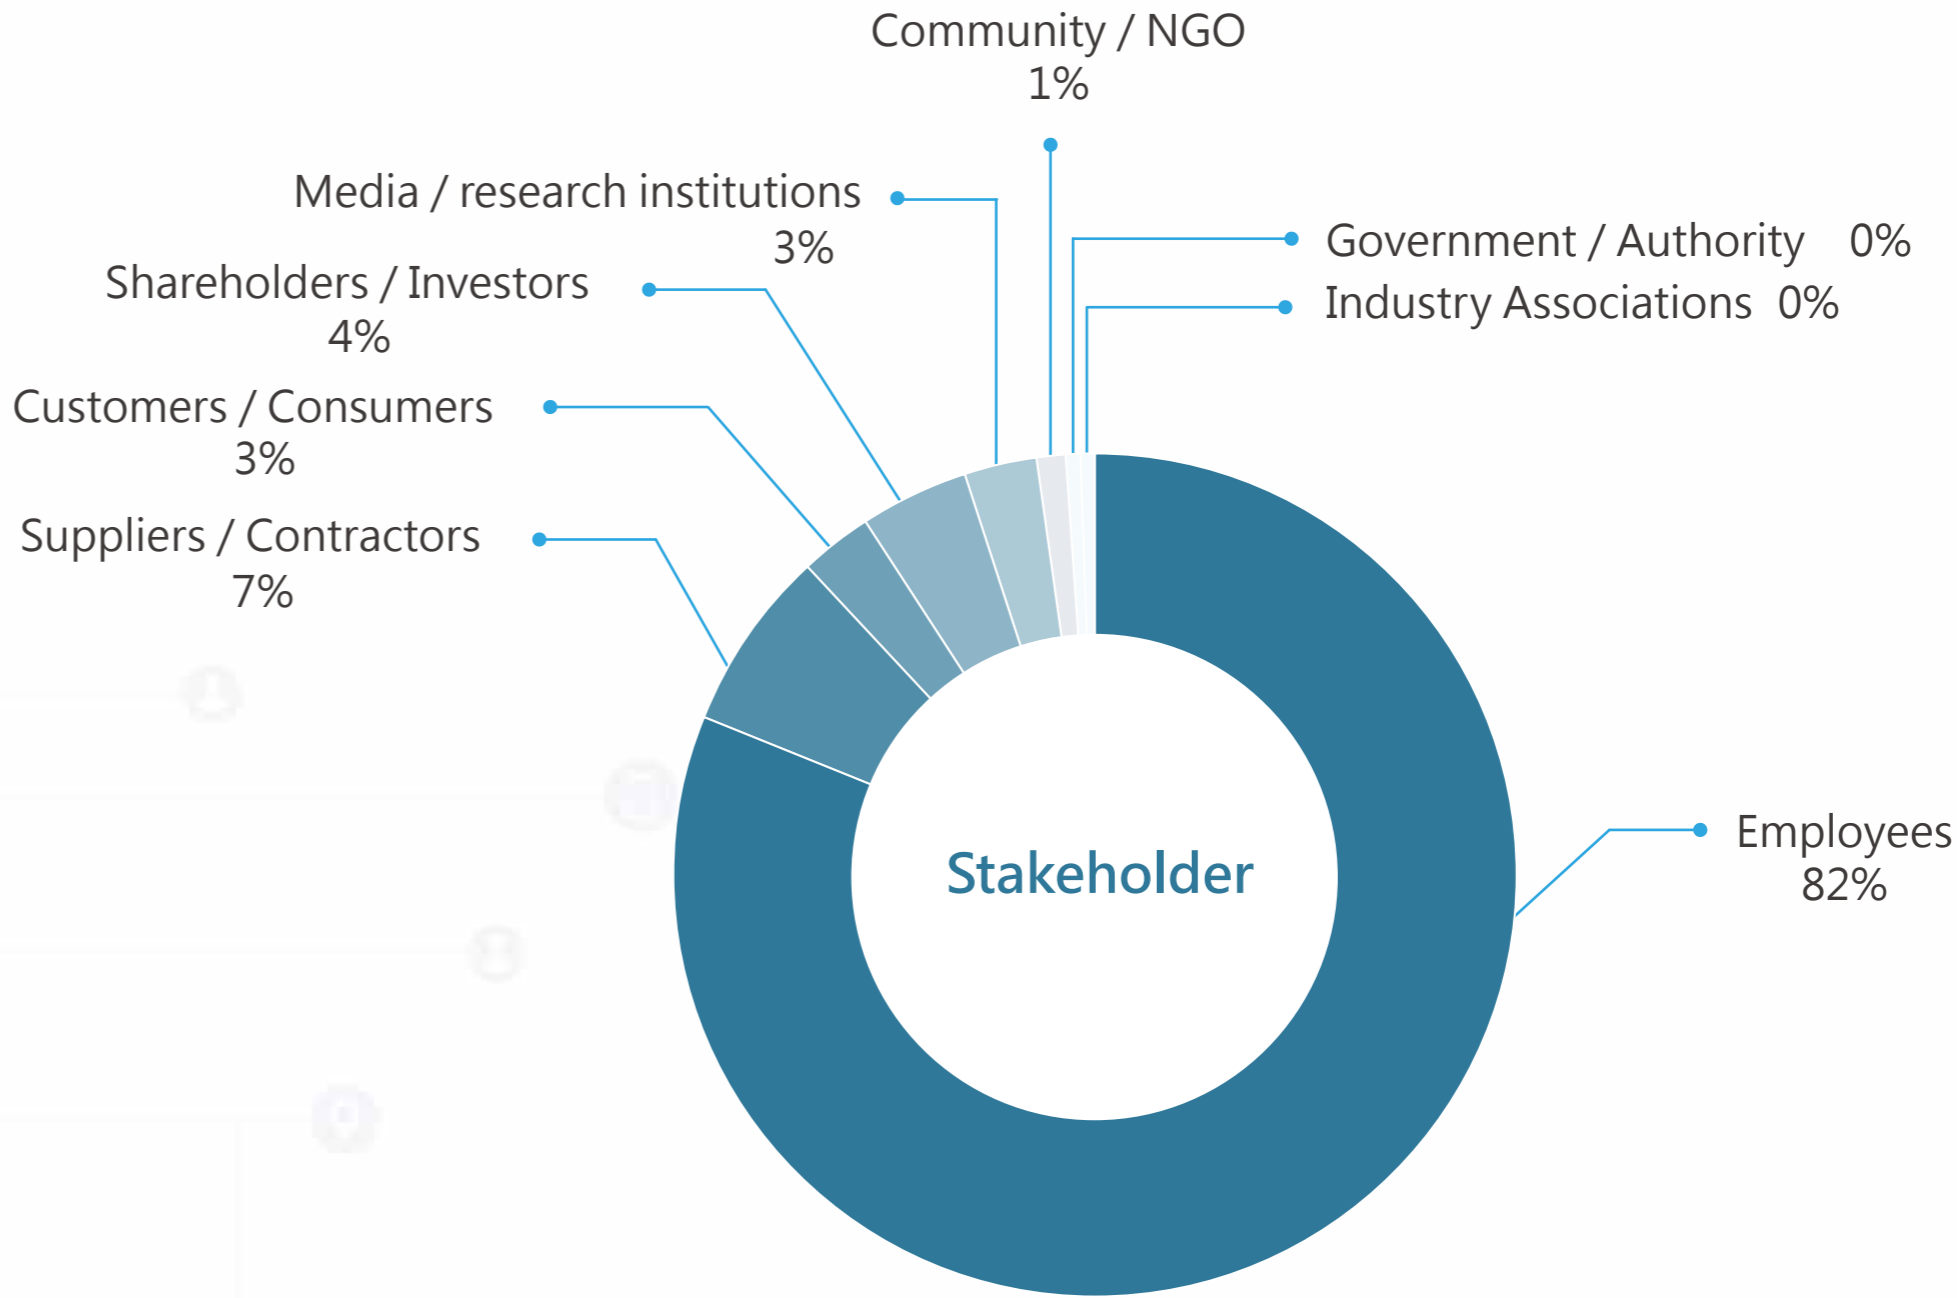

Step 3 : Gather Sustainability

Using the GRI Standard as the foundation, we have also incorporated the impact of the economy, society and environment on corporate sustainability to form the scope of BizLink's sustainability issues. We reviewed 17 sustainability issues from 2017 by borrowing from the experience of BizLink colleagues from various departments as well as that of other leading firms in the industry, before using GRI indicators and sustainability issues to form the scope of material issue identification.

Step 4 : Conduct Materiality Analysis to Determine Priority

For the stakeholders identified 2018, we conducted a materiality survey and collected 316 questionnaires describing the above-mentioned stakeholders' level of concern towards each issue. The same issues are assessed by our committee members and colleagues through questionnaires to determine the impact of the economy, society, and environment on the Company's operations, before the most important material issues with high levels of concern and impact are ascertained and prioritized.

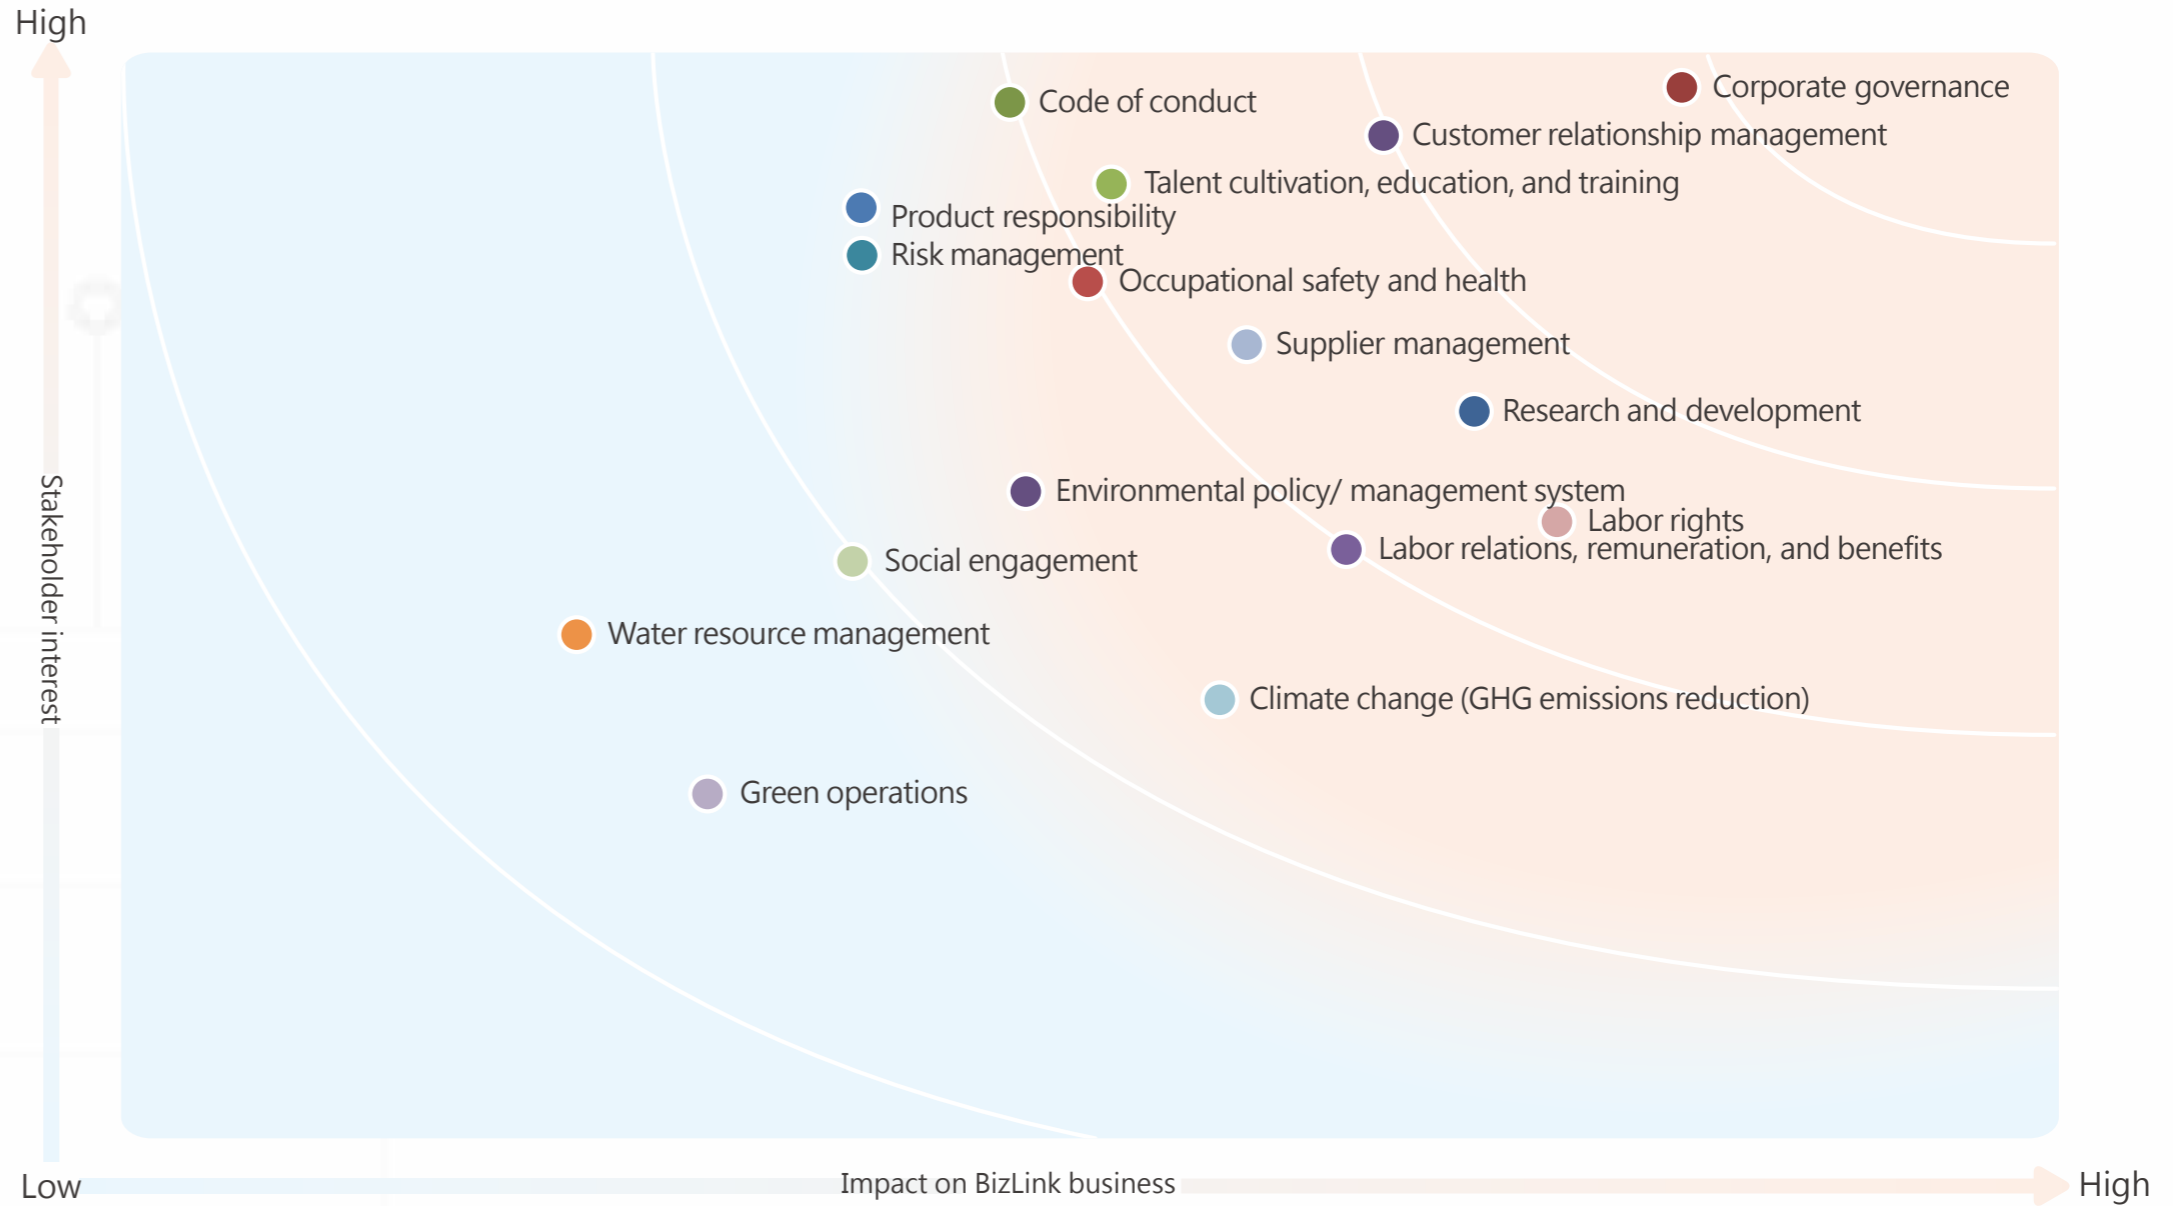

Stakeholder Survey : Diversified Composition

Step 5 : Scope and Boundary of Aspect Identification

For the prioritized materials aspects, the organization should determine whether or not the activity, product or service related impacts occur inside or outside of the organization in order to present a comprehensive value chain.

Analysis of Major Topics

Step 6 : Review and Discussion

The outcome of materiality analysis is discussed by the editorial team of the report to prioritize the 10 top material issues.

Item	Category	Material Issue	Explanation	Report Chapter	Page Number
1	Economic aspect	Corporate Governance Governance, ethics and, integrity, market image	Formation and functioning of the Board of Directors and audit	2.2 Corporate Governance	18
2	Economic aspect	Code of conduct	Formulation of code of ethical behavior and ethics, labor practice, human rights grievance mechanism, anti-corruption, privacy policy and violations	2.2.6 Ethics, Integrity and, Anti-Corruption	20
3	Economic aspect	Customer relationship management Customer health and safety, product and service labeling, marketing, customer privacy, legal compliance	Customer satisfaction, problem resolution procedure, quality management	3.3 Customer Service and Satisfaction	32
4	Economic aspect	Research and development	Innovative contents such as products, manufacturing process and society/environment	3.1 Innovative Product Design	24
